All items marked "NO" must be fully explained in "REMARKS", along with action to be taken to correct situation.

**REMARKS:**

This facility has moved to this location from a previous licensed address. The owner moved her dogs and horses to this location a few months ago, but has now found out she will leave this property in approx 8 months. The owner of the property is selling this 25 acre farm, and that leaves Ms. Renfro to go find another place for her animals. Currently the establishment has (2) areas where the dogs are kept. The first area is a double garage that she uses as a welding room and to house (2) male dachshunds. There is (1) welding pen approx 3'x8'x2' (1) pen

Additional Remarks:

aprox 2'x4'x2½' and (1) cage aprox 3'x3'x1'.

The other area dogs are kept is the outside area behind the home. There are (8) chain link pens ranging in size from aprox 5'x8'x4' up to 11'x10'x6'. All bottoms are dirt w/ pine shavings.

A current license has been applied for via mail.

Facility does not have smoke detectors or fire extinguishes since dogs are mainly kept outside.

Premise is in a good state of repair. The pens and cages are in good condition.

The premise is usually cleaned every 1-2 days, however, on my inspection today, it appears that pens have not been cleaned over past 3+ days. Owner said this is correct, due to various things that have been going on the past few days. Waste is scooped and placed in compost pile on back of property along with horse manure. Pens are usually disinfected monthly. The cages in the garage are clean except for the 3'x3'x1' cage, which needs immediate attention.

Disinfecting is done by using bleach solution and lime.

Adequate ventilation provided by fresh air and open windows. A roof is going to be constructed over the pens to supply more shade to the animals.

Warmth supplied by heat lamps and bedding.

Not all pens have housing for the dogs, and some are unable to escape from sun and element. Ms. Castro is installing dog houses for these dogs within a few days. She was going to lay concrete and build permanent houses for dogs, until she found her lease was not going to be renewed.

Dogs are fed and watered daily, both available via.

free choice.

It appears animals are not receiving adequate and humane care, due to the unsanitary conditions in some of the cages/pens and the lack of adequate shelter. The general health of the animals appear to be OK. In case of medical needs, Dr. McStuden of Cumming is used. All dogs have current rabies except for the ones that are pregnant or too young.

Records for sales/purchases are kept via AKC paper work and state forms.

I will return in a couple of weeks to check on cleanliness and installation of dog houses.

### Indays Inventory

- a) 5 dachounds - 10x10x4 pen (no shelter)
- b) 2 schnauzers, 1 - 5x8x4 pen  
min pin (blue)
